Date of Birth	

The following items are necessary to comply with the Registration Body’s Guidelines before freezing your dog’s semen:

1. Three photographs: Left profile of body, Right profile of body, Front view of body. All views need to be in a standing position and in color.
2. A copy of your dog’s registration certificate
3. A copy of your dog’s DNA profile certificate

The following procedures can be performed on the day of the collection or can be brought with you and must be dated within 10 days of the collection:

1. Health Certificate by a licensed Veterinarian
2. Brucellosis negative test

Canine Genetic Reserve and its staff will exercise extreme care and caution to prevent any injury to your dog. I authorize the collection, evaluation and freezing of above named dog by this facility. I will not hold CGR or its staff members responsible for any accident or injury to said dog unless due to negligence.
